Dear Competitor,

As you know we recently discussed the proposed use of the Unilogger to monitor the performance of your clutches and an email was sent out about this. This was done in the interest of all competitors to ensure fair play all round. The result of the email is that there have been no dissensions and no objections. This means that the Super One will go ahead with a large investment in the units so that each driver can be allocated one at each meeting.

The email also pointed out that each driver would be required to purchase a Fitting Kit and that the championship regulations would be modified. The order form for the fitting kit is now attached and you are required to fill it out and send it either by post to the address shown with your remittance or credit card details. Alternatively you can simply fill in your credit card details and email it back to me at the email address as shown.

I would like to take this opportunity to thank all the Rotax competitors for their cooperation in this matter. It is a big investment by Super One (we are the first Championship in the UK to use this system), but we sincerely believe that it is in the interest of all the competitors, the integrity of the championships and karting as a whole.

I look forward to receiving your completed form as soon as possible, but by the 6<sup>th</sup> July at the latest. Naturally if you have any questions then please feel free to contact me.

Yours sincerely,

John Hoyle,  
Director.
